## Career Objective

Results-driven LMS Executive and WhatsApp Automation Team Lead with hands-on experience in WhatsApp automation using Gallabox, LMS team coordination and EdTech operations, Proven expertise in managing learner communication, course content, online examination, and large-scale automation initiatives, including event and voting workflows. Startup-oriented professional with cross-functional exposure to React-based website development, website management, hiring support, and business coordination.

Bachelor of Engineering graduate specializing in Artificial Intelligence and Machine Learning, with hands-on experience working with AI and ML algorithms. Possess a strong foundation in machine learning concepts, data-driven problem solving, and practical application of AI techniques, supported by working knowledge of web technologies and data science.

## Skills

### Professional Skills

- WhatsApp Automation (Gallabox)
- LMS Administration (Learnyst)
- Website Management (WordPress)
- React Coordination (Basic)
- Client & Learner Communication
- Startup Operations
- Talent Coordination

### Technical Skills

- Python
- Machine learning Python
- HTML, CSS, JavaScript

- React
- MongoDB (MongoDB Compass)

## **Platforms & Tools**

- Gallabox
- Learning Management Systems (LMS)
- WordPress

## **Data & Analytics**

- Data Analysis Fundamentals
- Machine Learning Basics

## **Education**

**Vivekananda College Of Engineering And Technology, Visvesvaraya Technological University.**

Bachelor of Engineering - Artificial Intelligence & Machine Learning

CGPA: 7.16

*Puttur, Karnataka*

## **Experience**

### **Full Stack Developer**

Yaticorp India Private Limited.

*Dec 2024 - Present, Mangalore, Karnataka*

- Developed and managed company website during early startup phase, collaborating across departments.
- Maintained company website built on WordPress, executing content updates and page management.
- Coordinated website migration from WordPress to React, supporting testing and content integration.
- Independently created client website, focusing on requirement analysis and deployment support.
- Facilitated communication between technical and non-technical teams to ensure task execution.
- Designed and developed a React native-based website to host and manage online competitions.

Worked on API integration with Gallabox and MongoDB, and contributed to dashboard creation for the buddhiman project.

### **Whatsapp Automation, Yaticorp India Private Limited**

Yaticorp India Private Limited

*Dec 2024 - Present, Mangalore, Karnataka*

- Executed WhatsApp automation projects using Gallabox, designing effective communication flows and approved message templates.
- Managed end-to-end WhatsApp communications for the Ramotsav event, driving large-scale user engagement through structured automation workflows.
- Implemented a WhatsApp-based voting automation system for the Chittara Star Awards, enabling audiences to vote for nominated celebrities, ensuring smooth vote collection, validation, and real-time participant coordination.
- Implemented WhatsApp automation for the AI Card Project, streamlining card verification and user interaction processes.
- Integrated Gallabox APIs using React to connect with MongoDB for storing and retrieving user data.
- Contributed to AI Shikshak, the company's flagship EdTech product, by managing learner communications, automation workflows, and LMS-related coordination.
- Worked on Bhuddhiman, an initiative conducted to host and manage India's cultural and national events such as Independence Day, Krishna Janmashtami, Ganesh Chaturthi, and Navratri, handling WhatsApp-based announcements, event updates, and participant engagement.
- Integrated WhatsApp automation with LMS and internal tools to improve learner on-boarding, notifications, and ongoing support.

Collaborated with product, content, and support teams to deliver automation solutions aligned with business and operational requirements.

### **LMS, Learning Operations Executive**

Yaticorp India Private Limited

*Dec 2024 - Present, Mangalore, Karnataka*

- Oversaw end-to-end academic and platform operations for online learning programs as Team Lead.

- Created structured course notes and learning materials aligned with syllabus to enhance learner understanding.
- Managed organization and upload of video lectures, notes, assignments, and study resources in LMS.
- Planned and conducted online examinations, including assessment setup, evaluation coordination, and result tracking.
- Drafted topic-wise academic plans based on defined learning objectives and timelines for student instruction.
- Coordinated with faculty and technical teams to ensure seamless course delivery and timely LMS updates.
- Monitored learner progress, addressed queries, and resolved issues related to course access and assessments.

Ensured quality control of LMS content to maintain consistency across courses and batches.

### **Talent Acquisition & Channel Development Executive**

Yaticorp India Private Limited

*Dec 2024 - Present, Mangalore, Karnataka*

- Supported the company's hiring and talent acquisition efforts by identifying suitable candidates, coordinating interviews, and assisting in onboarding processes.
- Actively contributed to building the company's dealer and partner network, identifying potential dealers and onboarding them to support business expansion.
- Coordinated between management, HR, and external stakeholders to ensure smooth hiring and partner onboarding workflows.
- Assisted in preparing role requirements and communicating expectations to candidates and dealers.

Played a key role in strengthening the company's operational and sales support functions during the startup growth phase.

## **Python Full Stack – Short-term Training**

Pentagon Space

*Aug 2024 - Dec 2024, Bangalore, Karnataka*

- Attended short-term training in Python Full Stack Development, focusing on foundational concepts.
- Learned basics of Python programming, HTML, CSS, and JavaScript.
- Gained introductory understanding of frontend–backend interaction and web application flow.

## **Projects**

### **Ramotsav 2024 – WhatsApp Automation**

- Implemented a WhatsApp-based automation system for devotee registration to receive prasadam and schedule visits to Ayodhya.
- Enabled cultural competition registrations via WhatsApp and supported end-to-end online event coordination.
- Managed automated confirmations, updates, and participant communication at scale.

### **AI Card – WhatsApp Automation & LMS Integration**

- Worked on an AI course access system where users registered using AI Card credentials via WhatsApp.
- Integrated LMS APIs with WhatsApp APIs to route users automatically to their selected courses.
- Integrated Gallabox API with MongoDB using React Native.
- Streamlined user onboarding, course access, and communication through automation workflows.

### **Chittara Star Awards – WhatsApp Voting Automation**

- Developed a WhatsApp-based voting automation system for the Chittara Awards, enabling audiences to vote for nominated celebrities.
- Ensured smooth vote collection, validation, and user engagement during the event.
- Supported large-scale participation through automated messaging flows.

### **Buddhiman – WhatsApp Automation for National & Cultural Events**

- Implemented WhatsApp automation for national and cultural festivals including Independence Day, Krishna Janmashtami, Ganesh Chaturthi, and Navratri.
- Enabled event registrations, competition participation, and lead generation through WhatsApp workflows.
- Managed automated announcements, reminders, and participant communication.

### **Buddhiman Website – React**

- Designed and Developed website for Buddhiman using React Native.
- Integrated the website with WhatsApp registration flows to support event participation and information dissemination.

### **Navotsav – WhatsApp Automation**

- Executed WhatsApp automation for Navotsav, conducted as part of the Buddhiman Navratri celebrations.
- Handled participant registration, event updates, and engagement through automated workflows.

### **AI Shikshak – WhatsApp Automation (EdTech)**

- Supported the AI Shikshak project, an AI-powered learning assistant for 10th and 12th standard students.
- Configured WhatsApp automation to help students ask syllabus-based questions and receive accurate academic responses.
- Assisted in managing learner communication and support workflows.

### **Skin Disease Detection Using CNN**

- Developed a deep learning-based system to detect and classify skin diseases using patient image data, with outcome-based medicine recommendations.
- Implemented Convolution Neural Network using the VGG19 architecture for accurate skin disease classification.
- Performed data preprocessing, exploratory data analysis, and model evaluation, with attention to ethical consideration in healthcare AI.
- Achieved 96.8% classification accuracy on the validation dataset.
